

REMARKS:

The claims have been revised as requested by the Examiner and in the manner suggested by the Examiner to overcome the antecedent issue concerning the first suction opening. It will be appreciated that this amendment does not state nor imply that the invention as defined in the claims necessarily includes more than one suction opening. To the contrary, all of the claims may include only a single suction opening except in respect of those claims which clearly specify both a first and a second suction opening.

In view of the foregoing, further and favourable reconsideration of this application is respectfully requested.

Respectfully submitted

DEAN ROBERT ROSENDAHL
